PERRY CARBONE

SUMMARY

I am a junior full stack Ruby on Rails web developer with executive-level project management experience looking to grow my career as a programmer. I want to work for a company that is going to help facilitate that growth by 1) allowing me to collaborate with a team of talented developers on a daily basis; 2) exposing me to new languages and frameworks; and 3) expecting the best out of me each and every day. I want to invest myself in a company that is passionate and truly cares about the market they serve and the product they deliver. I am interested in companies across all industries, but would be particularly interested in working for companies in the music or entertainment fields.

TECHNICAL SKILLS

<u>Languages and Frameworks</u>: Ruby, Rails, HTML, CSS, ERB, Haml, JavaScript, jQuery, SQL, PostgresSQL

<u>Software Development and Misc.</u>: Git, Sinatra, Twitter Bootstrap, Heroku, CircleCI, TravisCI, TDD, Rspec, Capybara, Mailgun, Mailchimp, Mandrill, Sidekiq, Resque, Amazon S3, Stripe, Elastic Search, Redis, Memcached

WEB DEVELOPMENT EXPERIENCE

CO-AUTHOR, ACORNCACHE (*https://github.com/acorncache/acorn-cache*)

February 2016 - Present
Co-authored an open-source, configurable HTTP proxy caching gem for Rack-based Ruby applications. Improves page load times and lightens the load on application servers by utilizing in-memory cache that is shared by every client requesting a resource on the application server. Presented at NYC Ruby Roundtable on March 9, 2016

DEVELOPER, STAGE 39 PRODUCTIONS, INC.

August 2015 - Present
In charge of developing a web application that is providing interfaces for 1) client interaction, including input of critical event information, requests, instructions, etc.; 2) musician/employee access to tailored event information, including sheet music, mp3s of musical requests, and other relevant instructions on an event-by-event basis; and 3) back-office administrative support including reporting, work-flow management, and automated itinerary and 'gig-sheet' creation.

DEVELOPER, AUTO-ENTHUSIAST STARTUP

October 2015 - Present
Implementing various backend web application features and bug fixes in preparation for alpha release. Writing web-scraping scripts to assist with data aggregation.

PRIOR CAREER EXPERIENCE

ASSISTANT DIRECTOR, OPERATIONS, THE GARDEN CITY GROUP, INC.

May 2004 – June 2015
Primary project leader responsible for managing the relationship between GCG's operations group and its clients on over 65 administrations with total recoveries of almost $26.6 billion, total notices disseminated of more than 62 million and total claims processed of over 4 million. Responsible for consulting with clients and GCG senior executives; including providing status and budget updates, preparing project progress reports, and making case-related recommendations. Responsible for managing GCG operations, IT, graphics, analytical and other resources to profitably administer each project; and for supervising, mentoring and developing project staff. Also responsible for leading Quality Assurance efforts on several projects.

EDUCATION

LAUNCHSCHOOL, FULL STACK ONLINE SCHOOL FOR DEVELOPERS
Curriculum Completion, November 2015

BERKLEE COLLEGE OF MUSIC – BOSTON, MA
Bachelor of Arts, May 2003
